# 1. Executive Summary

Horizon Capital Foundation (HCF) introduces CNYT (Casino Network Yield Token), a comprehensive casino industry investment platform backed by real-world assets worth over \$100 million. CNYT represents fractional ownership in a diversified portfolio spanning premium casino properties, junket table licenses, and strategic gaming ventures across Georgia, Cambodia, Sihanoukville, and the Philippines.

|                    |                           |
|--------------------|---------------------------|
| Total Token Supply | 10,000,000,000 CNYT       |
| Initial Price      | \$0.01 (September 2024)   |
| Target Price       | \$1.00 (100x potential)   |
| Portfolio Value    | \$100M+ (Verified Assets) |
| TGE Date           | December 2026             |
| CEX Listing        | April 2027 (Targeted)     |

## **2. Vision & Mission**

### **2.1 Vision**

To become the premier tokenized casino industry investment platform, providing transparent, accessible exposure to high-yield gaming assets while maintaining institutional-grade governance and asset verification standards.

### **2.2 Mission**

- Democratize access to premium casino industry investments
- Maintain strict asset verification and audit standards
- Deliver sustainable value through diversified gaming portfolios
- Bridge traditional casino operations with blockchain technology
- Provide industry-leading governance and transparency

## 3. Problem Statement

### 3.1 Industry Challenges

- **Limited Access:** Premium casino investments traditionally require \$10M+ minimum capital, excluding retail investors.
- **Opacity:** Private casino deals lack transparency in asset performance and ownership.
- **Illiquidity:** Casino equity positions are highly illiquid with 7-10 year hold periods.
- **Geographic Barriers:** Cross-border casino investments face regulatory complexity.

### 3.2 CNYT Solution

- **Fractional Ownership:** Investment starting from \$10, opening premium assets to retail investors.
- **Real-Time Transparency:** On-chain governance and quarterly audited reports.
- **Enhanced Liquidity:** Token tradability creates liquid secondary markets.
- **Simplified Access:** Single-token exposure to diversified multi-jurisdiction portfolio.

## 4. Portfolio Assets

Horizon Capital Foundation maintains a diversified \$100M+ portfolio of premium casino assets across strategic gaming jurisdictions. All assets undergo quarterly independent verification.

| Asset Category        | Location             | Value | Ownership      |
|-----------------------|----------------------|-------|----------------|
| Golden Palace Tbilisi | Georgia, Tbilisi     | \$25M | 25% Stake      |
| Ocean Star Resort     | Sihanoukville        | \$15M | 30% Stake      |
| Junket Table Licenses | Multi-jurisdiction   | \$20M | 40 Tables      |
| LONGRISE AI Platform  | Strategic Investment | \$10M | Partner Equity |
| VIP Gaming Lounges    | 4 Locations          | \$5M  | Full Ownership |
| Cash & Reserves       | Operational Buffer   | \$25M | 100%           |

### 4.1 Golden Palace Tbilisi

Premium casino resort in Georgia's capital with 150+ gaming tables, 500+ slots, and luxury hotel facilities. HCF holds 25% equity stake with quarterly dividend distributions.

### 4.2 Ocean Star Resort & Casino

Integrated resort in Cambodia's Sihanoukville with 200+ gaming tables and VIP junket operations. HCF maintains 30% ownership with operational influence on VIP services.

### 4.3 Junket Table Licenses

Portfolio of 40 licensed junket tables across four jurisdictions. Average table generates \$500K annually in net commissions from VIP player operations.

# 5. Token Economics

## 5.1 Token Distribution

| Allocation            | Tokens        | %   | Lockup     |
|-----------------------|---------------|-----|------------|
| Founding Members      | 4,000,000,000 | 40% | 24 months  |
| Ecosystem Development | 2,000,000,000 | 20% | Vesting    |
| Strategic Partners    | 1,500,000,000 | 15% | 12 months  |
| Operations & Dev      | 1,000,000,000 | 10% | None       |
| Foundation Reserve    | 1,000,000,000 | 10% | Controlled |
| Marketing & Advisors  | 500,000,000   | 5%  | 6 months   |

## 5.2 Price Trajectory

| Milestone            | Date         | Price   | Multiple |
|----------------------|--------------|---------|----------|
| HCF Formation        | Sep 2024     | \$0.01  | 1x       |
| LONGRISE Partnership | Jan 2025     | \$0.02  | 2x       |
| Private Rounds       | Jan-Aug 2025 | \$0.045 | 4.5x     |
| Public Awareness     | Sep-Dec 2025 | \$0.20  | 20x      |
| Pre-TGE Phase        | Jan-Nov 2026 | \$0.80  | 80x      |
| TGE Event            | Dec 2026     | \$1.00  | 100x     |
| CEX Listing          | Apr 2027     | Market  | TBD      |

## 6. CNYT-CND Dual Token System

Following TGE, HCF will deploy a dual-token architecture providing both investment exposure (CNYT) and transactional utility (CND) with enhanced stability through robust collateralization.

### 6.1 Token Specifications

| Feature    | CNYT (Variable)        | CND (Stable)          |
|------------|------------------------|-----------------------|
| Type       | Security Token         | Stablecoin            |
| Price      | Market-determined      | 1 CND = \$1 USD       |
| Function   | Investment, Governance | Payments, Settlements |
| Governance | Yes (1 token = 1 vote) | No                    |

### 6.2 Minting & Burning Mechanism

Users can swap between CNYT and CND at market-determined ratios:

**Minting CND:** Burn CNYT at current market price to mint equivalent \$USD value in CND

**Burning CND:** Burn CND to mint equivalent \$USD value in CNYT at market price

**Example:** When CNYT = \$0.50, burning 200 CNYT mints \$100 CND. Burning \$100 CND mints 200 CNYT.

### 6.3 Stability Mechanisms

- **Collateral Reserve:** \$100M+ verified casino assets provide underlying value support.
- **Daily Minting Limits:** Maximum 1% of total CND supply per 24 hours.
- **Foundation Intervention:** HCF can halt minting/burning during extreme volatility.
- **Arbitrage Incentives:** Market makers restore peg equilibrium through profitable trades.

## 7. Governance Model

HCF employs traditional corporate governance adapted for token holder participation, balancing operational efficiency with stakeholder input.

### 7.1 Voting Rights

| Voting Matter               | Min Holding | Quorum | Approval |
|-----------------------------|-------------|--------|----------|
| Asset Acquisitions (>\$10M) | 10,000      | 30%    | Majority |
| Strategic Partnerships      | 10,000      | 30%    | Majority |
| Portfolio Asset Sales       | 10,000      | 40%    | 67%      |
| Fee Structure Changes       | 10,000      | 30%    | Majority |

### 7.2 Revenue Model

Foundation revenue does NOT distribute dividends. All revenue is reinvested into acquiring additional assets, expanding equity stakes, and strengthening infrastructure. Investors realize returns through CNYT price appreciation driven by expanding portfolio value.

## 8. Roadmap

| Phase        | Timeline     | Key Milestones                                          |
|--------------|--------------|---------------------------------------------------------|
| Foundation   | Sep-Dec 2024 | HCF establishment, Portfolio acquisition, CNYT issuance |
| Partnerships | Jan-Jun 2025 | LONGRISE partnership, Strategic rounds, Audits          |
| Growth       | Jul-Dec 2025 | Public awareness, Portfolio expansion, Community        |
| Pre-TGE      | Jan-Nov 2026 | Smart contracts, Security audits, Exchange partnerships |
| Launch       | Dec 2026     | TGE, Blockchain migration, CND deployment               |
| Expansion    | 2027+        | CEX listings, Geographic expansion, Liquidity pools     |

## 9. Risk Factors

- **Regulatory Risk:** Gaming regulations vary by jurisdiction and may change adversely.
- **Market Volatility:** CNYT price subject to cryptocurrency market dynamics.
- **Liquidity Risk:** Secondary market depth may be limited in early phases.
- **Operational Risk:** Casino operations face competitive and economic pressures.
- **Stablecoin Risk:** CND peg maintenance depends on algorithmic mechanisms.
- **Technology Risk:** Smart contract vulnerabilities or cybersecurity breaches.
- **Geopolitical Risk:** Political instability and currency fluctuations in emerging markets.

**Investment Disclaimer:** This whitepaper does not constitute investment advice. CNYT tokens carry substantial risk of total loss. Conduct independent due diligence and consult professionals before investing. Past performance does not guarantee future results.

## 10. Conclusion

CNYT represents a paradigm shift in casino industry investment accessibility. By combining real-world asset backing with blockchain transparency and fractional ownership, Horizon Capital Foundation delivers institutional-grade casino exposure to global retail investors.

With over \$100 million in verified portfolio assets, proven junket operations across four jurisdictions, and strategic partnerships with leading gaming platforms, HCF is positioned to capture the growing intersection of traditional gaming and blockchain innovation.

The dual-token architecture provides both speculative appreciation potential and transactional utility, while robust collateralization ensures sustainable value creation. As tokenization gains mainstream adoption, CNYT offers early participants transparent, verifiable, and liquid casino industry exposure.
